Welcome!

UQROP is proud to collaborate to First nation traditions by providing eagle parts. Our mission is to rehabilitate and release birds of prey found injured, but we can't save them all. You can learn about our conservation efforts by visiting www.uqrop.qc.ca.

We can offer those eagles parts coming from dead birds (dead on arrival, euthanized or dead during treatments). The parts include bones and flesh and must be kept frozen in our repository. This is why we will not send parts by mail or shipping services. Applicants must come to our facilities in St-Hyacinthe to pick up the parts once the request is processed. First come, first served. We also want to stay fair towards different communities. We hope that Band Councils could nominate a contributor to fill the request and to share the eagle parts to his community for different needs.

In general, the kit offered contains 2 wings (including all feathers and bones), 2 legs (talons and tarsus) and 1 tail. The package is tightly sealed and frozen.
